Chiara Germelli

Date of birth: 11/05/1997 | **Nationality:** Italian | **Email address:** cchiaragermelli@gmail.com | **Website:** https://chiaragermelli.github.io/portfolio-en/ | **Address:** Pisa, Italy (Home)

ABOUT ME

UX/UI Designer with an MSc in Digital Humanities. I design digital experiences with people at the center: from user research and wireframing to prototyping and usability testing, with an approach that combines analytical rigor and human sensitivity. My interdisciplinary background has trained me to understand both the logic of digital systems and the way people interact with them, a perspective I bring to every stage of the design process. My Master's thesis, focused on redesigning AI-powered medical interfaces and measuring user trust across different UI contexts, is a concrete example of how I approach design: always starting from the person and their relationship with technology.

EDUCATION AND TRAINING

2026 Pisa, Italy

MASTER'S DEGREE University of Pisa

- Master's thesis on measuring user reliance/trust in AI-based medical interfaces for oral lesion recognition: redesign and unification of two existing interfaces into a single flow
- Design and prototyping of user interfaces, with a focus on usability and testing with real users
- Knowledge of user research and user-centered design principles
- Visual communication and visual design using Adobe Suite (flyer, poster, brochure)

Field of study Digital Humanities | **Level in EQF** EQF level 7 |

Thesis Measurement of Reliance in an AI-Assisted Oral Lesion Diagnosis System

2021 Pisa, Italy

BACHELOR'S DEGREE University of Pisa

Field of study Foreign Languages and Literatures | **Level in EQF** EQF level 6

SKILLS

Figma | UX Research | Wireframes & Prototyping | Adobe Illustrator | Adobe Indesign | Microsoft office package

OTHER EXPERIENCE

2021 – CURRENT

Dance Teacher

Teaching dance to students of different ages and levels has sharpened my ability to communicate complex concepts in an accessible way, adapt to individual needs and guide with patience and empathy. It's the same approach I use in design: observing the user, understanding their difficulties, and guiding them toward a goal. Empathy, adaptability and clear communication are skills I built firsthand, on the field.

2019

Intern at Edizioni ETS (Publishing House)

During this internship, I discovered the foundations of UX/UI design. Working on layout and typesetting, I learned to handle visual hierarchy and content readability; proofreading sharpened my attention to detail, and direct contact with the public at the Pisa Book Festival gave me my first real experience in listening to and observing users. A journey from paper to screen, guided by the same principle: designing with the end user in mind.
